

**City Utilities of Richland Center Water Department will be doing 2026 water main flushing Monday – Friday the weeks of May 11<sup>th</sup>-15<sup>th</sup> and May 18<sup>th</sup>-22<sup>nd</sup>. Flushing this year will not take place during overnight hours and will start at approximately 6:00 am each day and run through mid to late afternoon to accomplish each day's areas of coverage (Flushing Zone). Storms or other unexpected circumstances may extend or postpone the flushing times or days.**

**During flushing times, the entire water system (not just the area covered in that day's flushing zone) may experience rusty, or cloudy water and may have reduced water pressure. The water is safe to drink but could discolor clothes washing.**

**The following link will take you to our interactive GIS map application that has the most current flushing zone information. You may click on a zone to see area covered and both the last and next flushing date. <https://experience.arcgis.com/experience/d091a250346f4551b3c625f12e8622db>**
