Transfer Station Closing March 31, 2026

The Richland Center Sanitary Landfill (Transfer Station) will close permanently on March 31, 2026. The last day of operation will be Monday, March 30, 2026.

Yard Waste:

Residents may continue to drop off yard waste—such as grass, leaves, and brush—at the current Transfer Station site after closure.

Curbside Service – Bulk Item Pickup

Beginning April 2026, Republic will have six large-item pickups per year (one per month, April–September). Each pickup allows up to five (5) items, under fifty (50) lbs. each, and manageable by one person. Items cannot include freon appliances, hazardous waste, yard waste, construction debris, or tires. Residents needing additional or out-of-parameter pickups can call Republic directly to arrange and pay for collection.

Illegal Dumping:

The City will monitor the site following closure. Cameras will be installed, and violations will result in enforcement action.

Alternative Disposal Sites:

After closure, residents can take general waste to:

- **Town & Country Sanitation, Inc.** – 104 Park St, Boscobel, WI 53805

Thank you for your cooperation as we transition services to ensure continued, responsible waste management for our community.
